Summary

Artificial Intelligence and Data Science undergraduate with hands-on experience building scalable mobile and full-stack applications using React Native, Flask, Firebase, and REST APIs. Skilled in backend development, real-time systems, NLP, and LLM-integrated applications with strong foundations in Data Structures, Algorithms, DBMS, and Software Engineering.

Experience

React Native Developer Intern

Jun 2024 – Jul 2024

AK Infopark Pvt Ltd, Nagercoil

- Developed cross-platform mobile features using React Native, improving UI responsiveness and overall performance.
- Integrated Firebase Authentication and Realtime Database with RESTful APIs for secure, real-time data sync.
- Optimized API calls and data flow, enhancing application performance and scalability.

Projects

PrepRadii - Peer Learning Platform sivanesh.me/prepradii

React Native, EAS, Firebase

- Built a scalable mobile app enabling users to discover nearby peers by academic interests and Exam Preferences.
- Implemented real-time chat using Firebase Realtime Database with low-latency communication.
- Integrated exam-based filters, authentication, and user profiles to enhance engagement and experience.

DeliTrack - Real-Time Order Management System sivanesh.me/delitrack

React Native, Firebase

- Developed a real-time system to manage delivery orders and personnel with role-based access control, replacing traditional paper-based workflows.
- Enabled live tracking and dynamic status updates using Firebase cloud infrastructure.
- Improved operational workflow through optimized data handling and tracking mechanisms.

Text-to-Speech - AI Web Application sivanesh.me/TTS

Python, Flask, gTTS

- Built a Flask-based web application converting text and article content into natural-sounding MP3 audio.
- Implemented preprocessing and robust error handling for reliable multi-format input processing.
- Optimized backend processing pipeline to improve audio quality, stability, and response time.

SMS Automation CRM github.com/sivanh1/SMS-AUTOMATION

Django, React, MySQL, Celery, Redis, Twilio

- Engineered a full-stack CRM platform enabling personalized bulk SMS campaigns, customer management, and communication automation for business operations.
- Designed an asynchronous message processing pipeline using Celery and Redis, supporting scalable SMS delivery with audit logging, scheduling, and delivery tracking.
- Implemented role-based access control, dynamic template rendering, Google Sheets/XLSX customer synchronization, and an integrated support ticketing system to streamline workflow management.

Skills

Languages: Python | Java | SQL | HTML | CSS

Frameworks & Technologies: React Native | React JS | Django | Firebase Realtime DB | MySQL | TailwindCSS | Git | VSCode

AI / Data Science: Machine Learning | NLP | LLM Application | OpenCV | Pandas | Matplotlib | Data Analysis

Core Skills: Quick Learning | Debugging & Optimization | Collaboration | Adaptability | Leadership

Education

St. Xavier's Catholic College of Engineering, Nagercoil

Nov 2022 - May 2026

B.Tech in Artificial Intelligence and Data Science

CGPA: 7.9

Relevant Coursework: DSA, Database Systems, Machine Learning, Data Science, Software Development, AI
